Glynn Hukins – Chair of Governors

Hello, my name is Glynn and I am the Chair of St. Peter's Governing Body.

I came to governance after being in education for many years in primary schools in Kent as I felt my experience and expertise could be used effectively to help drive standards forward at St. Peter's.

As Chair of Governors, I am part of the Leadership Team and together we are directly responsible for strategic planning and policy development in school. I also assist the Headteacher in appointing staff and we work together to ensure that the staff we employ have the skills and knowledge to deliver the very best education to the children.

Part of my role is also to monitor the children's progress against the targets that have been set for them in Reading, Writing and Mathematics. This helps us to evaluate whether the individual needs of every child in the school are being met.

For the year 2026– 2027, I will also be responsible for specifically monitoring Literacy, Pupil Premium and EYFS to verify that all children are making progress and that all additional funding is being spent to benefit our children in the best possible way.

I am also a member of the Worship Group which monitors that the Christian ethos of the school is being upheld.

My work at St. Peter's has led to me being involved as a governor in two other schools and I am also a Local Lead Governor. This has given me opportunities to support other schools in a governance capacity which has greatly widened my own experience.

I am married to Roger and have a grown-up daughter and two grandchildren. I am very much a part of my grandchildren's lives and enjoy spending time with them. I am always there to advise and support them through their school and life choices.

In my spare time, I attend Spanish classes and I also enjoy gardening, reading, travelling, going to the gym and the theatre.

I am a governor at St. Peter's because I passionately believe that all children deserve the very best education that is appropriate to their needs and I am proud to be part of a team that is also dedicated to this.
