

Maths at St Peter's - Teaching for Mastery

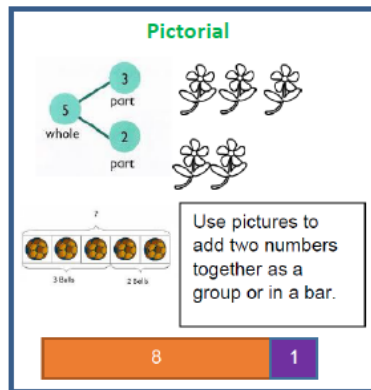

Our aim is for **all** children to **enjoy maths** and have a **secure and deep understanding** of fundamental mathematical concepts and procedures when they leave us to go to secondary school.

Teaching for Mastery – Concrete, Pictorial, Abstract

Concrete - providing children with objects and resources to manipulate in order to demonstrate their mathematical thinking.

Pictorial - providing opportunities for children to represent their mathematical thinking through diagrams, images, drawings or models.

Abstract – providing opportunities for children to become more familiar with formal mathematical representations including signs, symbols and digits.
